

Job Description – Design Engineer(s) based in the United States or Germany

Introduction

SchuF is a world leading provider of valves and valve solutions to the Chemical, Refining, Pharmaceutical, Plastics and Polymers, Mining, Aluminium, and Power industries.

Headquartered in Eppstein, Germany, the SchuF Group has design and manufacturing subsidiaries in Brasil, Germany, India, Ireland and the United States. It's network of sales offices and agents can be found in most major cities across the globe.

A key element of SchuF's Global success has been our ability to attract the best engineers in industry for our Design, Project and Sales groups. Employees at SchuF work in a challenging yet relaxed, and multi-cultural environment.

Role Description

- Work closely with the sales and project engineers to enable a good understanding of the customer process or valve requirements
- Prepare the necessary dimension, process, and physical valve characteristics calculations
- Establish a parts list using the SchuF state of art company ERP system
- Create design drawings for diverse valve parts and valve variants
- Analyse part or valve deficiencies and contribute to the companies Quality Improvement Program
- Propose improvements to existing valve designs
- Contribute to the efficient working of the Design team
- Work on International design projects as required

Position requirements

- Technical qualification in Mechanical Engineering or detailed valve engineering experience
- Experience of CAD systems (e.g. AutoCAD or Solid Works) is essential
- English language skills are highly desirable
- German or other language abilities are a distinct advantage
- Work experience in a Valve or similar company is beneficial but not essential

Personal Characteristics

- Person who works well in a team and enjoys a collegial atmosphere
- Creative and not afraid to share your ideas
- Willingness to learn
- Detail oriented

If you feel that you match the above listed requirements, and would like a secure and rewarding career with a stable yet growing company please forward you career details to us either by e-mail, fax or by post to:

By Mail or Fax:
